PROJECTS

- **Credit Card Fraud Detection** Nov 2024
Tech : Python, Pandas, NumPy & Matplotlib
◦ Developed and fine-tuned a logistic regression-based machine learning model achieving an 87% accuracy rate in predicting credit card fraud.
◦ Used Pandas and NumPy for efficient data manipulation and analysis, ensuring robust handling of large datasets
◦ Through rigorous feature engineering and hyper parameter tuning processes minimized false positives by percentage.
◦ Enhancing fraud detection efficiency by 23% and accuracy by 6%, leading to a 15% overall performance improvement.
- **Student Performance Prediction :** oct 2024
◦ Achieved a 96% accuracy rate in forecasting student academic performance by developing and deploying a machine learning model.
◦ Managed data integrity by handling missing values and encoding categorical variables, enhance quality by 33%.
◦ Conducted experiments with both classification and regression algorithms to identify the most suitable approach.
◦ Identified and comprehended key factors that influence academic performance through thorough analysis.
